

CHRISTIAN A. MANGAO

Flutter Developer | Mobile & Desktop Engineer

Makati City, Philippines | mangao.christian.04@gmail.com | +63 961 490 1967

PROFESSIONAL SUMMARY

Software Engineer with Mid to Senior years of experience, specializing in Flutter and cross-platform tools across Mobile, Web and Windows Desktop applications. Developing Application Systems for Student's Thesis and Business Owner and Proven track record in Enterprise system modernization for a known large-scale company nationwide.

CORE TECHNICAL SKILLS

- **Mobile, Web and Desktop:** Flutter (Mobile & Windows), Kotlin (Native Android), Angular (Web)
- **Architecture & Patterns:** MVVM, Clean Architecture, Modular Architecture, State Management (Bloc, Provider, Riverpod)
- **Backend & Integration:** Laravel (PHP), Spring Boot (Apache Camel), RESTful and SOAP APIs, Caching & Query Indexing
- **Databases:** MySQL, SQLite, Firebase Firestore, Couchbase, PostgreSQL, Supabase
- **DevOps & CI/CD:** Git & Github, Jenkins, Bitbucket, Azure DevOps, Google Cloud, Codemagic, Docker, Vercel, Hostinger
- **Security & Performance:** Secure Auth, Memory and large-scale database optimization, Performance Profiling, Debugging

PROFESSIONAL EXPERIENCE

Flutter Developer

May 2026 – Present

Rising Tide Digital Inc. (Deployed at NCVI / PJ Lhuillier Group)

- Architecting and developing Flutter for Windows desktop applications to modernize and migrate legacy C# .NET core systems across 3,500+ branches nationwide.
- Engineering backend microservices and API integrations using Apache Camel Spring Boot connected with Couchbase Server database.
- Implementing API optimization techniques including server-side caching and indexing to significantly reduce query response times for enterprise-scale operations.

Software Developer - TSII

July 2024 – January 2026

Alliance Software Inc. (Deployed at Cebu Pacific Airlines)

- Implemented front-end modules in Angular TypeScript for enterprise aviation booking platforms.
- Engineered native Android applications using Kotlin and Android Studio and published releases on the Google Play Store.
- Conducted thorough code reviews, enforced software engineering coding standards, and mentored junior developers in Flutter best practices.

Freelance Software Developer

March 2022 – July 2024

Independent / Freelance (Student Thesis and Business owners)

- Architected and developed 10+ custom mobile and web applications utilizing Flutter and Laravel for business clients and academic research projects.
- Integrated RESTful APIs, Firebase backend services, and cloud platforms.
- Optimized mobile application performance, UI responsiveness, and memory management across multi-platform targets.

EDUCATION

Bachelor of Science in Information Technology

University of Science and Technology of Southern Philippines – Oroquieta City
